

It's Time for ABC Accreditation

Two important announcements have set future standards in O&P Patient Care. First, CMS released new Quality Standards calling for mandatory accreditation of all O&P and DMEPOS facilities. Following this announcement, ABC was awarded Deemed Status as an accrediting organization, validating our consultative approach and standards.

What does this mean for your O&P practice?

This means if your facility is not accredited, your future ability to serve the Medicare population is at risk. ABC accreditation will satisfy the main requirement of the new CMS quality standards, and current ABC accredited facilities will hold distinct advantages in the future. So stop worrying about future changes in Medicare. Make sure you are a Qualified Supplier with ABC accreditation.
