

# O&P Assistants

BE RECOGNIZED FOR YOUR TRAINING AND EXPERIENCE –

*Become an  
ABC Certified  
Assistant!*

**If you are currently working as an orthotic or prosthetic assistant, now's the time to gain recognition for your training and experience.**

**The future of the profession depends on your skills.** Many O&P practices are looking for ways to deliver services more cost efficiently, ways that allows them to meet the challenges of today's health care regulations while effectively meeting the needs of an increasing patient population. Your unique position may be the answer for many practices as they look to the future.

**ABC's Certified Assistant credential will be phasing in over the next three years** — for 2011, the eligibility requirement is your experience in the profession. Take advantage of this window to become certified as an orthotic or prosthetic professional.

For more  
information on the  
Certified Assistant  
program, go to  
the ABC website at:
