

**With all the Medicare changes coming our way,  
will you still be a qualified supplier?**

## **Make sure with ABC Accreditation.**

There's no getting around it. Big changes are coming to Medicare's payment policies. And that makes the advantages of ABC accreditation even more important when it comes to being sure that you are a qualified supplier.

Why? Because ABC has been the leading national credentialing body for the orthotic and prosthetic profession since 1948. Our name has come to represent the highest O&P standards for quality care as a result of our comprehensive facility accreditation program, stringent requirements, examinations and mandatory residency for practitioners, and registration for assistants, technicians and fitters.

So stop worrying about future changes in Medicare. Make sure you remain a qualified practitioner or qualified supplier with ABC Credentialing. For more information or to get started on your way, call 703-836-7114 today or go to our website at [www.abcop.org](http://www.abcop.org). It's a good decision that will look better and better in the months and years ahead.
