

## Do your footdrop patients need knee control but refuse a KAFO?

Allard USA has evolved custom KAFO technology to provide you the components to fabricate a KAFO your patients will wear! A Dynamic functional orthotic solution for the management of genu-recurvatum accompanied with footdrop.

Introducing COMBO...Innovative KO attachment for ToeOFF® or BlueRocker™

- Like all ToeOFF® Family Products, COMBO is lightweight – less than 2 pounds!
- Low Profile
- Comfortable hyperextension control interface
- Easy to don and doff
- Easily removed when wearer is relaxing (watching T.V. etc.)
