

You Asked, We Listened!

Function you've come to appreciate from Allard!

Anterior Shell

- Increases balance by providing proximal stability and proprioceptive feedback
- Avoids pressure on calf muscles and Achilles tendon

Lightweight and Durable

- Structurally superior design made from carbon fiber, fiberglass, and Kevlar

Graded Stability

- Accommodates different patient's needs, sizes, and stabilizing properties

Rigid Lateral Strut & Dynamic Footplate

- Function together to achieve "push off" during 3rd rocker of gait
- Reflects energy and restores propulsion

Open Heel

- Allows calcaneus to invert and evert which happens naturally during gait cycle

ToeOFF®
2.0

The changes you requested!

New Strap System

- Reduces potential to flex wings forward, decreasing risk of damage
- Alligator tab is easily applied for right or left hand "pull"
- D-Ring closure feels more secure
- Wider straps for increased comfort
- Velcro on inside of "Wings" provides less chance for lint build-up or to "snag" clothes

More Gently Contoured "Wings"

- Fits comfortable to the anatomy
- Less surface area for damage

Taller X-Large Size

- X-Large size is 3/4 inch taller to accommodate longer tibia

All MicroFIX Pre-Applied

- Faster application of SoftKIT or ComfortKIT

Smooth Surface

- Smoother inside and out
- Scratch resistant outer surface

ToeOFF® Supports Patient Outcomes!

Provides a more stable, fluid, propulsive,
and symmetrical gait pattern
