

# 4 truths about digital foot scanning.

*How to build a serious FO profit center, easily and affordably.*

**1. A digital foot scanner CAN be a profit builder.** Amfit's Footfax™-SL digitizer reduces labor costs (~50%), return rates (<3%). • Pays for itself in months. • Unlimited digital foot file storage (no plaster casts).

**2. The right computer-based system IS easy to use.** Patented, icon-based medical software is easy to use, and puts you in control of orthotic prescriptions immediately. Refined over 12 years of clinical use, it puts Rx modifications conveniently at your fingertips.

## AMFIT®

Where technology fits.  
Perfectly.

**3. Digital foot scanners ARE clinically proven.** Amfit orthoses have proven clinical efficacy and high patient acceptance, in millions of patients worldwide. Highly accurate 3D casting gives your patients a precise and predictable fit, every time.

**4. Amfit digitizers DO make functional rigid orthoses.** From the digital foot files, the CAD/CAM mill carves either a negative or positive model for rigid and semi-rigid orthoses.

Amfit, the leader in foot orthotic technologies, offers significant advantages for a profitable custom foot orthotic business.
