

For more than 25 years, Anatomical Concepts has held itself to a simple philosophy – It's about the **PATIENTS!**

That includes your younger patients, who present unique orthotic challenges. Our goal is to help improve their current and future quality of life in the most functional way possible. Our multifunctional pediatric and infant lower extremity orthoses allow for sequential correction of the existing or pre-existing deformities, and accommodate the child's growth in the most affordable way.

Dual Action Orthosis
Product # 553SKG
553SKB

EV™ Orthosis
Product # 551SKG
PDAC Approved L4396

Help Kids Do What They Love!
