

# KNEE MANAGEMENT ORTHOSIS

Anatomical Concepts, Inc., is pleased to introduce the KMO® (Knee Management Orthosis), a COST EFFECTIVE patient friendly and simple approach to the orthotic management of the knee.

### KMO® APPLICATION:

- For an adjustable range of stabilization of the knee in the sagittal and/or the coronal plane as the patient's conditions warrant
- For pre and post operative management of bony and soft tissue injuries
- Ideal for application following hamstring releases, ligament repairs, total knee arthroplasty, and chronic systemic conditions
- For immediate prophylactic protection at end range until treatment plans are finalized

*Shown with optional stabilizing polyethylene shell.*

**EXTENSION**

**FLEXION UP TO 110°**  
(Additional ROM may be attained.)

**HEIGHT ADJUSTMENTS**  
18-24" Adult  
13-17" Pediatric

**VARUM/VALGUM  
ADJUSTMENTS**

Circle # 107 on Readers' Service Card
