

650 APU[®] ORTHOSIS

Anatomical Concepts Inc. now offers a multifunctional, ambulatory Articulated AFO for your patient in the earliest stages of their rehabilitation.

The benefits of prescribing the 650 APU (Adjustable Posterior Upright) Articulated AFO includes:

- Heel strike at initial contact
- Stability in stance phase with the secure walking base
- Optimal ankle and knee position with adjustable Dorsi and Plantar flexion
- Accommodating fluctuations in the diameter and circumference of the lower leg
- Maintaining soft tissue length with secondary benefit of offloading options

Unique in design, the 650 APU is truly one of a kind

Your patients can be fitted with the 650 APU prior to neuromotor status stabilization, providing the potential for enhanced rehabilitation efforts and patient outcomes.

Call Anatomical Concepts Inc. today and provide a multifunctional Articulated AFO that facilitates early weight bearing treatment for your patients.
