

ARTech Laboratory, Inc.

Silicone Prosthetics to Restore the Original Appearance

**Custom fitted for the
ultimate patient comfort.
Custom sculpted, in great
detail, to the mirror image
of the sound extremity.**

Traditional prostheses have been fabricated primarily to restore function with little emphasis on the aesthetic appearance.

ARTech's natural looking restorations are virtually undetectable.

ARTech silicone prostheses can improve gait and posture, ease lower back pain, relieve pressure on bone spurs and other sensitive areas, protect the tissue from further injury, improve the operation of myoelectric hands, etc.

When a restoration has a natural appearance, sculpted and painted to match the opposite limb, as opposed to the robotic or mannequin look of traditional prostheses, utilization by the patient is maximized.
