

AOPA National Assembly
Sept. 29 - Oct. 2, 2010
Orlando, FL
Booth #221

1-877-DELCAM-1

Custom Orthotic CAD/CAM Suite

Coupling Delcam's 40 years of CAD/CAM experience with expert knowledge from a panel of experienced partners, Delcam is able to create software that:

- Increases accuracy and consistency
- Reduces manufacturing costs
- Reduces patient waiting times and recovery times

Delcam Orthotic CAD/CAM Solutions replaces the traditional messy and expensive foot casting process. Digitally design and manufacture with:

iQube Scanner

Whether you need to scan a foot, a cast or a foam box impression, iQube can produce a high quality 3D image in seconds.

OrthoManager

OrthoManager manages all the information created throughout the lifecycle of an order and provides full visibility and traceability at all stages.

OrthoModel

OrthoModel is a simple yet powerful software tool to design any type and complexity of corrective or accommodating custom orthotic.

OrthoMill

OrthoMill takes designs from OrthoModel and quickly generates cutting instructions for all types of machining centers.

Delcam's Healthcare Division is focused upon providing the medical and healthcare markets with powerful, dedicated software solutions assisting medical professionals.
