

How quickly do you need a CRO?

Our **CRO Walker** is a neuropathic healing boot designed to offer maximum flexibility, patient comfort and ease of maintenance to the attending practitioner. The orthosis consists of a custom molded clamshell design in your choice of composites, or thermoplastics with a removable, self-molding, plantar liner and sub liner available in 5mm and 10mm Plastazote®, or Aliplast®. Removable, interchangeable, liners allow for swelling and edema issues, and assist in cleaning and replacement.

Features:

- Removable liners for ease of cleaning and replacement
- Composite versions available for added strength and support
- Thermoplastic CRO Walker
- Composite CRO Walker

Indications:

- Diabetes Mellitus
- Hansen's Disease
- Charcot Joints

Clamshell design with removable liners
