

Have you seen our newest addition? Modular Component Series from Becker

We have enhanced our comprehensive line of orthotic components by adding a new modular series of knee joint options. Providing locked (1017), ratchet lock (1018), and stance control (9005/9006) options, this modular series will offer versatility and ease in the fabrication of your orthosis.

9006

To further complement our modular line, we now offer Slim Line Modular Ankle Joints

SLM-2825

available with a 3/4" or 5/8" recess to accommodate our A & B size modular knee joint uprights. Available in both stainless steel and aluminum, the SLM-2825 is the perfect addition to our modular line.

For over 75 years Becker Orthopedic has led the industry with high quality, innovative orthotic components and central fabrication services.

The tradition continues today. Whether you're looking for conventional orthotic knee joints, or our latest modular joints, Becker Orthopedic has the right orthotic option for you.
