

UTX[®]

The UTX[®] Line of stance control KAFO's has recently been enhanced with new features and models, as well as a new and innovative way to measure patients for custom UTX KAFOs.

Ambrose Digital Order Technology (DOT) only requires the use of your Smartphone and a special wall template that can be ordered through Becker Orthopedic. With the patient positioned on the template, simply take a picture with your Smartphone and email it to our Custom Fabrication Services Department for processing. For more information, please contact one of our customer service representatives at (800) 521-2192.
