

HiFi Femoral and Tibial Socket Training NOW AVAILABLE ONLINE

Do your patients complain about their sockets?
Do they find them uncomfortable, heavy or bulky?
Do they suffer from pain, blisters or pistoning?

Maybe it's time to try the HiFi™ Interface System with patented and patents-pending technology

"The HiFi makes me feel more secure and makes mobility more comfortable and easier. It is less and lighter, but I can get more out of it."
– Jeff

"I was in traditional sockets previous to my HiFi's and they felt bulky, loose and heavy. In my HiFi's my prostheses feel connected to me – they feel lighter, more comfortable, secure and I forget they are there."
– Aimee

"The HiFi is really working for me. It is absolutely amazing how much control I have with my residual limb. It actually makes my Rheo knee seem much lighter."
– Bill

"The HiFi has worked flawlessly and my balance, posture, and walking has improved 100%. I would not have anything else."
– Bob

"I put on my HiFi and I don't want to take it off."
– Jessica

HiFi is backed by evidence-based clinical support

A recent study showed the subsichial HiFi Interface outperformed ischial containment sockets. Wearers had improved balance and walking with the HiFi.

Technology and Innovation, Vol. 18, pp. 167-173, 2016.

Get Trained and Licensed in the HiFi Tibial, Femoral, Radial and Humeral Levels by Randall Alley, HiFi Inventor. Get superior outcomes while increasing revenues. The HiFi Interface and Imager technologies are patented and patents-pending. Unauthorized use of the technology or trademarks is not permitted. If you would like to utilize our technology in custom, modular, or socket kit applications, contact us today for a license.
