

Pediatric Bracing

FEATURED ABOVE - JET

Key: 1. Thigh spacer system 2. 9 inch frame 3. Anatomical hinge 4. Finger strap suspension
5. Lightweight aluminum frame 6. Tibial spacer system 7. Condylar suspension

Jet

The Jet knee brace is designed with children in mind. The shorter frame fits proportionally to a child's leg length and the hinge has been reduced to match the anatomy of the smaller knee. The aircraft aluminum frame provides support, strength and durability, while still remaining lightweight.

INDICATIONS:

Ligamentous injuries to the ACL, PCL, MCL, LCL, meniscus and Juvenile Osteochondritis Dissecans.

WEE WALKER

PADDED SLEEVE

Wee ROM Post Op

Padded sleeve provides cushion and protection. Durable foam construction is designed to withstand up to the toughest of conditions.

INDICATIONS:

Protection from contusions, bone bruises, Osgood-Schlatter disease, tendonitis and bursitis

Wee Bow Post Op

Locked or limited motion control of the elbow during rehabilitation, after operative procedures or injury to the elbow.

INDICATIONS:

For immediate application following injury or operative procedures to the elbow, or for stable fractures of the distal humerus or proximal to middle radius or ulna.
