An All-Around Great Fit

Proprietary internal mechanism allows precise adjustments

## For The Patient

Only patented\* ComfAlign Spinal Supports feature a lumbar control that permits precise lumbar adjustments from 0° to 40°; a unique strapping system for ease of application and adjustment; and molded, gender-specific shapes that assure unparalleled comfort while controlling improper motion. Incorporating ComfAlign Supports enables patients to have the support they need before leaving your office. Improved comfort and convenience help improve compliance.

## For The Practice

Assure patients are fit with support and protection, exactly as prescribed, right in your office, during their initial visit.

With ComfAlign Supports on site, you can conveniently provide more complete care, enhancing the value of your practice. ComfAlign Supports are cost-efficient, compact and easy to stock. A certified orthotist is available to train your staff in the simple application technique. A specially assigned billing code simplifies reimbursement, and you have the full support of The Bremer Group Company.

To learn more about how ComfAlign Supports are an all-around great fit, visit our website at [www.bremergroup.com](http://www.bremergroup.com), see your Bremer Group Representative or call **800-428-2304**.
