

Brace Selection Made Easier By More Than 25 Years of Experience

No two patients have the exact same bracing needs, and no single brace will work for every patient presentation.

Cascade Dafo has spent more than 25 years developing braces to address the wide range of bracing needs, and has now developed a way to match each patient with the proper brace. Our Product Selection Guide is an invaluable tool that will help to simplify brace selection and ultimately help you provide your patient with the very best care.
