

Wrap-Around Support... No Casting Needed!

The JumpStart® bracing system has grown into five affordable solutions for young children who present with significant instability during weight bearing. These precision-molded double-shell full wrap-around foot supports can be ordered by measurement: no casting is needed. JumpStarts are exciting additions to our Fast Fit™ family for moderate pronation, supination, inconsistent ankle modulation and knee hyperextension in children with fully correctible foot alignment. Each JumpStart has a fun new name to appeal to the young patients they are designed for. All JumpStart products include a full 30-day warranty.

- Thin, flexible plastic
- Ideal for low-tone patients
- Easy to adjust to
- Fit easily into most shoes
- Affordable bracing option
