

The Best Patient Care Starts with a Great Team...

Cascade Dafo works to bring Physical Therapists together with Certified Orthotists for the best possible patient care

We want your patients to receive the right Cascade DAFO®, and we believe that happens most often when there is an effective working relationship between a **Physical Therapist**, a **Certified Orthotist** and the **Cascade Technical Support Team**. The Physical Therapist knows the patient and the goals of treatment, while the Orthotist understands the science and mechanics of bracing. Cascade's dedicated technical support staff completes the team with extensive knowledge of casting, brace selection and fit issues. This collaboration helps parents obtain the best possible bracing solution.
