

Send Us Your Scans!

Thanks to our expanded Digital Manufacturing capabilities, we can deliver braces faster than ever.

Cascade Dafo has spent the last four years developing a Digital Manufacturing process to complement our traditional manufacturing methods. Practitioners can now scan and upload digital files to CascadeScans.com, rather than shipping the fiberglass or plaster cast.

Benefits of Digital Manufacturing include:

- ✓ *Significantly reduced turnaround time*
- ✓ *No inbound shipping costs*
- ✓ *Same excellent Cascade quality and warranty*
- ✓ *Enhanced ability to produce precise, consistent, and reliable results*

Learn more about digital scanning for DAFOs by visiting us online at www.cascadedafo.com/digital or stop by booth #812 at the AAOP Annual Meeting
