

COLLEGE PARK CAPITAL

The new Capital knee from College Park is a hydraulic, single-axis joint that is easy to use for both patients and clinicians. It uses smooth and responsive hydraulics to accommodate variable gait and activity levels. Durable, lightweight, and fresh water friendly, the Capital is available in four stylish colors.

Easy Mode Selection

The Capital features a convenient switch on the back of the knee, allowing the user to quickly toggle between locked, normal, and free swing modes.

Simple Adjustments

The Capital's flexion and extension settings can be adjusted using a 4mm hex wrench.
