

INNOVATE

celsus™ responsive mobility

Bringing College Park technology into the K2 market, the balanced design and natural motion of the Celsus provide smooth, stable transitions. It's the perfect lightweight design to promote confidence and security for your lower impact patients.

MULTI-AXIAL FUNCTION

Discover solid footing even on challenging terrain. Just like the human foot, the Celsus adjusts quickly and easily to uneven surfaces, keeping the forces up and down, not side to side.
