

INTRODUCING AXIS®

LOCKING SHOULDER JOINT

THE AXIS FEATURES A
240° RANGE OF MOTION
WITH 24 DIFFERENT
LOCKING POSITIONS

Unlike any shoulder on the market, the redesigned AXIS shoulder joint by College Park provides a natural range of motion and ease of use for the patient's daily life. It's operated through simple switches, lockable every 10 degrees, and provides adjustable abduction friction, yet can bear loads up to 50 pounds.
