

Coyote Air-Lock™

Not all locks are created equal

Our dual suspension airtight locking system has just gotten even better. Now it's easier to use, and still gives you the benefits of a "suction" lock.

Call us to find out how an airtight socket reduces milking and pistoning, while benefiting your patients and your bottom-line.

One piece pin design is easier to install and use

New pin geometry reduces play and noise

New o-ring makes sealing and fabrication easier

New stronger springs for a stronger hold

Lock plate geometry reduces wear

Better quality lock housing

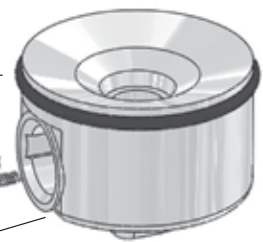

New inserts for the Alignable Connector replaces Fast Four Connector and allows for multiple offset options

Alignable Connector still offers offset alignment in a single lamination

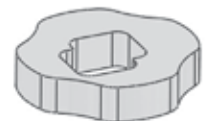

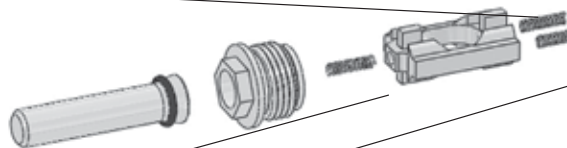

Improved trouble-free anchor makes fabrication simpler and easier
