

THE EASY-OFF™ LOCK

Grips when you need it, releases easily when you don't

Our newest vacuum-compatible lock combines a pin with suction and can be used with an elevated vacuum system. The unique lever design remains open as long as needed without holding the release button continuously, for easy doffing. Great for amputees with limited hand strength, arthritis or trouble reaching release buttons!

- **Can be used with elevated vacuum mechanisms**
- Dual suspension suction pin lock system
- Easy donning and removal with lever release
- Great for amputees with hand strength issues
- Single-stage lamination
- Offset alignment capability
- Water-resistant
- Eliminates the possibility of lock jams
- Dual o-ring system for positive seal

CD117 Easy-Off Lock

Patent No. 6334876. Other patents pending.

The Easy-Off is shown open (top) and closed (center). Photo to right shows the pocket created during fabrication that protects the lever when closed.
