Providing Amputees Adjustability

The Smart IP adjusts to the optimum function as it automatically detects what is happening during the gait cycle. At any time the wearer can activate the knee and re-program to suit specific activities and environment.

- Enhanced range of walking speeds
- Smoother gait
- Cost effective
- User friendly
- 275lb weight limit
- 2 year warranty

*Activate it and walk around:
the Smart IP programs itself!*

The Brio allows instant heel height changes while maintaining optimal alignment.

- Pyramid receiver attaches to any foot w/proximal male pyramid
- Single push button allows wearer to quickly adjust foot for different shoes or activities
- Maintains optimum alignment, reducing stress on residual limb
- Adjusts up to 1.25", size 26cm
- 275lb weight limit
- 2 year warranty

*Liven up your life
with the Brio Adjustable Heel Device.*
