

ENDOLITE

Enabling ... Empowering ... Inspiring

the SmartIP Microprocessor Knee programs itself!

Endolite's SmartIP combines energy saving microprocessor controlled swing phase and weight activated stance control, providing superior stability and function to K3 level amputees.

EASY as 1, 2, 3 simple steps...
the knee is programed to the individual

Features:

- Stable weight activated stance control
- Wide range of walking speeds
- 3V lithium batteries last for 9-12 months
- Do not require charging
- Easily sourced and replaced
- No programmer required

The Esprit foot provides a soft rollover and excellent energy return for active walkers seeking a comfortable lightweight foot.

Features:

- Energy management
- Dynamic heel
- Propulsion
- Stability on all terrain
- Low profile, lightweight design

SmartIP + Esprit =

Optimal Stability, Function, and Comfort for Active Walkers
