

When it comes to new prosthetic technology, we've been very, very busy.

eliteVT

The *eliteVT* combines superior vertical shock compression with axial rotation to provide proportional response enabling amputees to *get busy living*.

The Elite VT incorporates a precision engineered spring to provide a more dynamic active vertical shock system with integrated axial rotation. Combined with our proven foot technology the Elite VT raises the bar by offering the active amputee an energy efficient, low profile vertical shock foot that is easy to cosmetically finish.

Circle # 58 on Readers' Service Card

Endolite is deeply committed to strengthening the quality of life for every member of the amputee community by offering the most innovative prosthetic engineering and service in the world.
