

"Any technology which is sufficiently advanced is indistinguishable from magic"

-Arthur C. Clarke

## avalon

The avalon provides 12° of controlled ankle motion, giving level 2 users increased confidence and security.

experience the magic

## élan

The élan offers users patented microprocessor controlled assist and brake modes for optimized momentum and stability

## echelon

The echelon's unique hydraulic ankle provides controlled plantar and dorsi flexion

## echelonVT

The echelonVT merges the fluid movement of our hydraulic ankle with the responsive function of our e-carbon foot springs and machined titanium spring

Stop by our booth at the 2012 AOPA National Assembly to experience the magic of the latest advancements in knee and ankle technology.

BOOTH 105

# ORION

Our new ORION software gives you the option of using the OnBoard Smart Programming or the PC based software suite. The ORION programming and database software allows the practitioner to adjust and monitor the kinetic and kinematic gait parameters, as well as save and record user details and settings to the database.
