

Where performance  
meets lifestyle

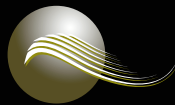

# ORION<sup>2</sup>

The ORION2 is the next generation of microprocessor knee technology. With a new, sleek frame and features such as fixed angle flexion lock, cycling/free swing mode & an increased yield rate, the ORION2 offers unprecedented versatility for the user.

By utilizing the OnBoard Smart Programming and the new ORION software, you can ensure that the ORION2 will be programmed and fine tuned to each individual's walking patterns giving users a flawless performance.
