#313 in
Seattle!

Innovative features of the KINEGEN *stream*

- no overheating due to a big diameter of the hydraulic cylinder
- A-P slide option for enhanced alignment possibilities above the joint head
- high stability and durability
- for activity levels 3 to 4
- high flexion angle up to 145°
- approved up to 150 kg
- provides comfort due to built-in, pre-configured extension impact absorption
- length reduction of the lower leg during swing through (toe tip does not catch the carpet)
- load relieving on the contra lateral hip joint
- long-term prevention of the spinal column
- less perpendicular motion of the upper body during walking
- reduced force induction needed to initiate the swing phase
- easy switchable into the freewheel mode (bicycling mode)
- wide adjustment range of hydraulic resistances in flexion and Extension
- very smooth gait pattern
- futuristic premium design
- running smoothness
