different

Velocity Alignment & Mounting Plates

Sometimes simple is best. Use Bondo and scotch cast to mount the socket on the alignment plate and move your 4 bolt adaptor anywhere you want. Add an angle plate and you're set.

Yes, it's large, but you'll be amazed at the time it can save. Once the alignment is complete, swap it out for one of our mounting plates.

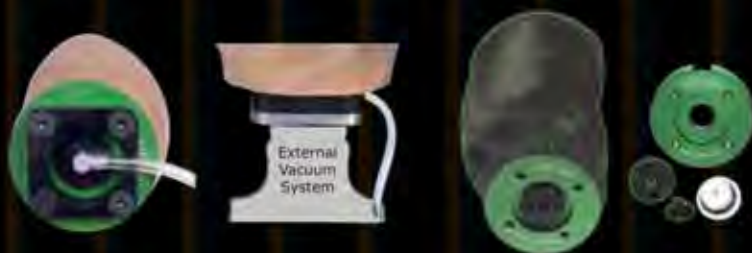

The low profile mounting plate (blue) is designed for patients up to 250 pounds or K1 to K3 levels.

The heavy duty mounting plate (green) is recommended for patients above 250 pounds or high activity levels.

The pediatric mounting plate (purple) utilizes the same technology for laminating as our adult size plates.

Velocity Vacuum Valve & Expulsion Valve

Advantages of the Velocity Valves include:

- Large duckbill for quick air expulsion
- Creates a seal directly against the lamination
- Inserts into Velocity 4 bolt mounting plate
- Inexpensive replaceable duckbill
- Available in kits or individual parts
- NOW AVAILABLE IN PEDIATRIC SIZES TOO!

EVOLUTION *Silk*

EVOLUTION
ORIGIN

CHAMELEON
Liners especially for kids!

Features of the Evolution Liners include:

- A silky surface that allows the liner to slide on itself
- Compatible with all high vacuum sockets
- No coatings that crack, peel or wear off
- No covers to tear or run
- Medical grade silicone
- Easy to don and doff
