EVOLUTION LINERS, INC.

A division of Evolution Industries, Inc.

## EVOLUTION ORIGIN

Originating from our custom Silk liners, we now offer standard sizes in both pin and cushion configurations. Matrix comes standard in the Origin pin liners, and as an option in the Origin cushion liners.

## CHAMELEON

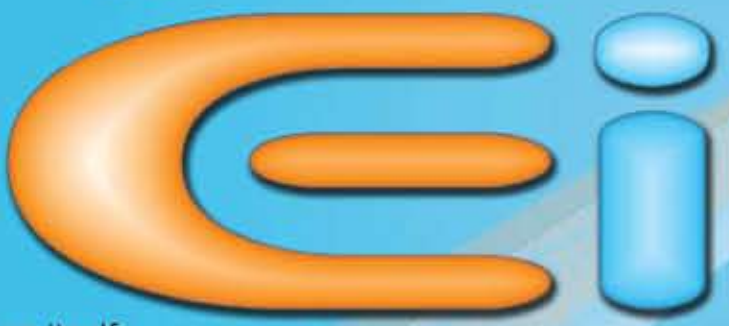

New liners especially for kids!

Chameleon liners are sized especially for kids, and are available in 4 colors.

### Features of the Evolution Liners:

- A silky surface that allows the liner to slide on itself
- Easy to don and doff
- No coatings that crack, peel or wear off
- No covers to tear or run
- Compatible with all high vacuum sockets
- Medical grade silicone

## EVOLUTION INDUSTRIES INC.

## EVOLUTION Silk

Designed by a certified prosthetist, Evolution Silk custom liners fit the exact needs of each user.

Our liners are more durable than custom urethane liners. Liners can be made from a negative cast, positive cast, and AOP files from INSIGNIA and other systems.

## Central Fabrication

Velocity Central Fabrication is capable of manufacturing a wide variety of lower extremity devices including AK and BK double wall systems. All of our products and services utilize state-of-the-art technology and materials.

## Velocity Expulsion Valve

The Velocity Expulsion Valve works in combination with our VMP-007 mounting plate and is hidden in the distal end of the socket. The valve system allows vacuum systems that seal directly to the bottom of the socket to be used, creating a safety valve in case of a failure.

## Velocity Vacuum Valve

Velocity Labs expands our new Velocity Expulsion Valve to include a vacuum hookup valve. The Velocity Vacuum Valve can be hooked up to any high vacuum socket system.
