

## Custom liners... ...because everybody's different.

Designed by a certified prosthetist, Evolution Silk custom liners fit the exact needs of each user. Evolution Silk liners are manufactured from a unique medical grade silicone that keeps the liner fresh and odor free. Cushion and locking designs are available.

Because each Evolution custom liner is fit to your patients anatomy, each patient has their own mold in our library for easy reordering.

Our liners are more durable than custom urethane liners. Liners can be made from a negative cast, positive cast, and AOP files from INSIGNIA and other systems.

### Features of the Evolution Liners include:

- A silky surface that allows the liner to slide on itself
- Easy to don and doff
- No coatings that crack, peel or wear off
- No covers to tear or run
- Compatible with all high vacuum sockets
- Medical grade silicone

New custom Silk liners are produced in 5 business days. Please send AOP files to [liners@evolutionliners.com](mailto:liners@evolutionliners.com). Production time does not include shipping.

For more information, please call or visit us on the web at [www.evolutionliners.com](http://www.evolutionliners.com).
