

# Sockets Made Simple

vacuum or expulsion? your choice!

# Central Fabrication

specializing in lower extremity high quality sockets

**Customizable**  
Sockets can be customized with your choice of quality components and supplies, a variety of skin tones and unique decorative laminations. See liquidblue.com for available t-shirt designs.

**Lighter, Stronger Sockets**  
Definitive sockets are made from a special weave and weight of premium carbon fiber that results in a lighter, stronger socket.

**Check Sockets**  
Evolution check sockets are made from PETG, thermolyn with or without components.

**In-House Development Process**  
Evolution Industries uses leading edge techniques and the making of our sockets is also part of the development process for Evolution's componentry line.

### Evolution Component Systems

Evolution's component systems give the clinician the most versatility to mix and match a wide variety of resources in today's market. Innovated, tested, and proven in our own central fabrication facility, Evolution's components and supplies provide a more efficient and high quality fabrication system with less room for error. Our components and supplies make for a solidly reliable solution that will let you evolve and develop the best system for your patient's lifestyle.

turn it into a quality carbon fiber socket

### Evolution Central Fabrication

Evolution's central fabrication facility provides high quality full service lower extremity socket creation. Choose from a wide variety of builds, componentry, and materials to custom build each socket to be made exactly to your specifications. Our technical team is comprised of individuals including certified technicians and on site prosthetists.
