

Custom ORIGIN

What is Origin?
Origin Liners are created from a leading edge medical grade silicone formula that is naturally compatible with human tissue and resistant to fluids and bacteria, allowing the liner to remain fresh and odor free after each use. Origin liners never reduce in strength or thickness and are intended for patients of all lifestyles and activity levels.

3mm Proximal
wall thickness

6mm Base
wall thickness

Extra Thickness
under fibular head, medial condyle, and anterior distal tibia

Distal Thickness
13mm for Cushion
21mm for Locking

Custom Silicone Liner
The Custom Origin is excellent for uniquely shaped limbs and/or sensitive limbs. It can be made from a positive cast, negative cast, and AOP files from INSIGNIA and other systems. Initial liners can be produced in 5 business days, additional liners on request in 3 business days.

Echo Compatible

Together the **Echo** combined with the **Custom Origin** are an innovative and cost effective solution for vacuum and expulsion systems.

Echo Locking Seal

What is Echo?
The Echo Locking Seal is an internal seal system developed specifically for medium to firm tissue density and a compact and lightweight approach to securely lock a liner to the inner wall of the socket. They are designed specifically to be compatible with Origin Silicone Liners and Vacuum or Expulsion Systems.

ORIGIN Compatible

Easy to Use
machine washable, light, and durable

Embedded Silicone
solid silicone seal fully embedded into one ply sock

Echo V-Seal
V-Seal is designed for medium to firm tissue density

The Locking Seal
Both the Aura and the Echo are 'locking seals' made to allow the prosthetist to select the height of the seal for both transtibial and transfemoral patients. The Aura Locking Seal is designed for soft tissue density. Both are available in standard and custom sizes.
