

ORIGIN™ *Custom*

Choose the right liner for your patient

Patients requiring a custom liner have uniquely shaped limbs, and can be a clinical challenge. We excel at designing and producing liners of unusual shapes specifically for these patients. Our medical grade silicone is durable yet soft, and contains a silk feature that allows the liner to slide on itself for easy donning and doffing.

Origin Custom liners are the best choice for vacuum and expulsion systems.

- Designed by a certified prosthetist
- Exact fit for each patient
- Rapid turnaround time
- Can be fabricated from a cast or AOP file
- Cushion and pin configurations
