

Evolution Industries' Full Service Central Fabrication Facility

QR CODE SCAN WITH PHONE

We specialize in lower extremity sockets. All of our definitive sockets are made from a special weave and weight of premium grade carbon fiber that results in a lighter, stronger socket your patients can count on day after day. They are available in a variety of skin tones, carbon fiber black, and further customization is possible with t-shirt designs from Liquid Blue.

Evolution's team of professionally trained technicians, innovative approach, state of the art facility, and striving to be 100% confident in all of our workmanship allows us to provide the best in central fabrication services. Our team offers many different options in check sockets and definitive sockets including variations that require more skill and experience. At Evolution, you don't just get one experienced technician, you get the whole team.
