

# Central Fabrication

Find Evolution at the Orlando AOPA! Booth #1401 9/18 - 9/21

## Lower extremity check & definitive sockets

### Customizable

Sockets can be customized with your choice of quality components and supplies, a variety of skin tones and decorative laminations.

### Lighter, Stronger Sockets

Definitives are made from a special weave and weight of carbon fiber that results in a lighter, stronger socket.

### In-House Development Process

We use leading edge techniques and incorporate the making of Evolution's sockets into the development process for our componentry line.

### Check Sockets

Evolution check sockets are made from PETG and thermolyn with or without components.

## Evolution Central Fab

We offer check socket, definitive sockets, unique customization options, and a wide variety of components.

# EVO-BOND

## Evolution's Fast-Set Adhesive

Intended for use in bonding Evolution's plates to check sockets or inner PETG for definitive sockets.

- 100% Solids Urethane Chemistry
- Black Pigment for Definitive Laminations
- Durability with Flexibility
- Gap-filling Capabilities
- Fast Cure Time

### What is EVO-Bond?

Evolution Industries' EVO-Bond is a fast-curing 2-component urethane. The hi-strength chemistry is a perfect balance between strength and resilience.

Available in October!
