

.Sockets Made Simple

Secure your system with the VMP-007

For example: any of these component configurations below will fit into a VMP-007 socket.

For Sleeve	Aura & Echo Compatible Component Kits					NEW! For E2
For Use With ePulse	For Use As Expulsion	For Use With Unity System	For Use With LimbLogic	For Use With ePulse, Unity System	For Use With Harmony E2	
The Seal Plate system is made for patients using a sleeve.	These component configurations make your socket compatible with the Aura and Echo Locking Seals. The push button release installed in each of these plates lets air back into the socket which allows the patient to get out.					

Evolution Component Systems

Evolution's component systems give the clinician the most versatility to mix and match a wide variety of resources in today's market. Innovated, tested, and proven in our own central fabrication facility, Evolution's components and supplies provide a more efficient and high quality fabrication system with less room for error. Our components and supplies make for a solidly reliable solution that will let you evolve and develop the best system for your patient's lifestyle. For more systems see our component configuration manual on the downloads page of our website: www.evoii.com.
