TOTAL SERVICE

Evolution's total service includes everything you need when it comes to lower extremity custom and off the shelf clinical prescriptions. Example: for your transtibial patient, submit a cast or AOP file once for a Custom Origin Liner, Aura Locking Seal, and Check Socket. Submit changes for the Definitive Socket and have a completed system for your patient ready to go! Vist our website for more information on the total service process.

"Evolution offers liners, suspension, components, check, and definitive sockets. Use the same measurements, cast, or AOP file to take you through the entire lower extremity clinical process with Evolution's **total service**."
