

Evolution Industries | Custom Origin Wave & Locking Seals

Look for the Wave Feature under Custom Origin at www.evoii.com

Wave & Echo

The Wave Feature for the Custom Origin is compatible with the Aura & Echo locking seals.

QR Code for Custom Origin

Mobility

Reduces liner distal pull and bunching behind the knee for easier knee flexion.

Durability

Uniform waves mean that the silicone is the same thickness throughout, so the durability is equivalent to a normal silicone liner.

Echo (shown) and Aura Locking Seal

The innovative Aura and Echo seal the silicone liner to the interior of the socket, providing a cost effective solution for vacuum and expulsion systems.

Embedded Silicone

The silicone is fully embedded into the sock for an airtight seal against the silicone liner.

Compatibility

The Aura and Echo locking seals begin after the wave feature to provide the same dependable suspension.

Follow Evolution:   

Aura patent: 8,097,043 Echo patent: 7,144,429

“Evolution’s **Wave Feature** combines with the **Aura and Echo** locking seals to create superior lightweight vacuum and expulsion systems with greater freedom of movement.”
