- › 6 Standard Sizes: Small to Extra Large
- › Available in Locking and Cushion
- › 6mm Anterior, 3mm Posterior and easy to don and doff
- › Designed especially for unilateral/bilateral transtibial

## What is the Evolution UNIFORM?

The Evolution UNIFORM is created from an advanced silicone elastomer formula that is naturally compatible with human tissue and resistant to fluids and bacteria—great for patients with sensitive skin and also allows the liner to remain fresh and odor free after each use. The Evolution UNIFORM fabric cover provides the necessary longitudinal support while allowing for the necessary radial compliance to accommodate for the extra stretch in the silicone. It also makes donning and doffing easy.

"The advanced silicone elastomer formula designed specifically for UNIFORM liners gives patients a soft, stretchy, and comfortable feel. This combined with conventional uniform sizes and profiles makes the Evolution UNIFORM a cost effective choice for a variety of patients."
