SUSPENSION SLEEVES AND DOUBLE
WALL SOCKETS ARE A THING
OF THE PAST...

Aura

The Aura is a sock with a specially designed seal to work with expulsion or vacuum systems, which allows the prosthetist to select the height of the seal. Used in combination with Evolution custom Silk liners, Origin off the shelf liners or any uncovered liner, the Aura seals against the outer surface of the liner and the inner wall of both AK and BK sockets eliminating the need for a sealing sleeve or bulky double wall systems.

Auras are inventoried with the seal at a standard height. Special order Auras are available if a non-standard height is required.
