

**Are you paying for the cost of pretty boxes,
overpaid salesmen,
and expensive advertising?**

**DON'T
DO IT!**

PAY FOR THE PRODUCT!

At **Velocity Labs** we believe in paying for the product, not all that extra stuff. That's why you will always receive an inexpensive, quality product from Velocity Labs.

The **OTS Liner** is made from medical-grade silicone with an outer coating making it easier to roll on. The liner comes in seven different sizes and in cushion or pin, soft cup or standard, and three design variations for BK, AK, and high-vacuum AK sockets. All of the cushion liners can be used in high-vacuum socket systems.

The 3mm **OTS Sleeve** is made from the same medical-grade silicone as the liner and is available with or without a matrix.

Velocity **Central Fabrication** manufactures a wide variety of lower-extremity devices including AK and BK double-wall systems.

Velocity **Mounting Plates** are designed for ease of use with a large tie-in groove and lamination dummy.
