AN ACTIVE PATIENT IS A HEALTHY PATIENT

GET ACTIVE, GET BTK

The Bartlett Tendon Universal Knee (BTK)

Natural knee action is accomplished by the combination of the newest generation BTK air/oil shock unit and a patented multi-durometer elastic tendon configuration.

The BTK is unlike any knee for addressing amputee sports & rehabilitation activities. BTK technology works in synergy to provide a muscle driven system, delivering smooth, consistent energy return and unique user feedback.
