

INTRODUCING CROSSOVER
THE WORLD'S FIRST EXTENSIBLE PROSTHETIC KNEE

Crossflex™ wedges are designed to act like knee cartilage. These pre-flexion foam wedges for sport activities come in a three pack kit - in 20°, 30° and 40° degree wedge settings.

See it for yourself in Boston at **booth #1035** at the AOPA National Assembly **Sept 8-11th.**

CrossOver Workshop
Learn all about the CrossOver knee at our workshop **Thursday Sept 8th, 10:30am - 12pm, MWC-1.**

Infinite Possibilities.

Designed To Accommodate Changes.

CrossOver can be used for everyday walking and -with simple additions/adjustments- can be used for low and high activity sports.

Take A Walk On The Wild Side.

Walking knees are good for walking only and sport knees are not good for walking. That's a big problem for the user with real life transitions from one activity to the next. CrossOver bridges that gap, the world's first extensible knee that delivers high performance in all activities.

Brian Bartlett inventor and athlete.

Adapts To You. No Tools Required.

You will be amazed at what you can do with this knee! CrossOver allows you to make adjustments on the spot with no tools. Shred the hill and then walk to the lodge! CrossOver's got all daily aspects of your life covered.

Demo A CrossOver Knee Today!

You or patient can evaluate this extensible knee for 10 days before committing to a purchase. Apply today. Supplies are limited.
