

THE NEXT EVOLUTION IN COMPOSITE FIBER

Tames Irritation

Come see us at the 2013 AOPA
National Assembly, Booth 513

Date: Wednesday, September 18th
Time: 10:30 AM - 12:30 PM (2 Hours)
Title: High Performance Prosthetic
and Orthotic Laminations Utilizing
New Synthex® Composite Fibers

Working with carbon fiber can turn your shop into a jungle. Unlike carbon fiber, Synthex does not itch and irritate when ground. Don't be fooled by other products. New Synthex™ is military-grade technology. The performance and comfort of plastics. The strength of composites. 10x the impact strength of carbon fiber. Non-toxic. Non-conductive. Considerable cost savings.

Easy to work with. Does not micro fiber when ground. **No more itch.**
