

**CARBON, GLASS
AND MORE!**

**BEST PRICES IN
THE INDUSTRY!**

**NEVER A SPLICE
IN OUR CARBON
OR GLASS SPOOLS!**

**You want it
heavy,
we got it!**

With Fabtech, you get what you pay for.

Carbon & glass braids are sold by the pound from the manufacturer. Yield for carbon and glass braid is based on a feet-per-pound yield ratio set by the manufacturer.

Have you ever pulled on carbon or glass braid? Most carbon and glass braid is pulled off a spool and cut at its stretched length, *dramatically affecting yield.*

At Fabtech we have our manufacturer weigh the material as it is rolled onto the spool from the weaving machines. So our customers are guaranteed they get what they pay for *every time.*

We carry all common sizes of carbon and glass braid. Check us out for carbon and glass tapes, and other lamination materials.
